Diego Marting Lenoir

Student Computer Science

I'am actually a student in computer science at UCL. I'am 22 years old and i'am looking for a job to finance my studies.

Education

Computer science

Since September 2022 UCL Louvain-La-Neuve

CESS technique de transition informatique

From September 2015 to June 2018 Pierrard Virton

Computer technology

From September 2019 to June 2022 Ephec Louvain-La-Neuve

In 3 years I learn how to create websites in frontend and backend, how to create applications , how to construct and use databases.

Work experience

Student IT

From July 2021 to July 2022 PallCenter Oberpallen

Student in the It service where I was able to touch all areas of IT and consolidate my different knowledge.

Internship

Fullstack web Developer

From February 2022 to June 2022 Pallcenter Oberpallen

I created a website from the beginning. I had to make a web application that is used to make return of products of the shop.

More

HACKATON

The hackaton is a challenge that starts on Friday night and ends on Sunday afternoon. The principle here was to develop something that had a connection to the conquest of Mars. Basically, we wanted to create a kind of interface that is used by the eyes. But given the size of the project, we reduced the load while keeping the desired aspect. So with my team, we created a game that looks like space invaders. But playable with the eyes.

TUTORING

For two years at Ephec, I tutored different students who had complications. I mainly helped students who had problems in web development.
